Klára Ambrožová, Lubomír Soukup**

Milan.Talich@vugtk.cz

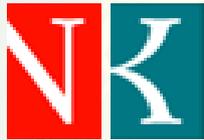

Digital Approaches to Cartographic Heritage, Riga 20-22 April 2016

project „Cartographic sources as a cultural heritage“

- **Subtitle: Research of the new methods and technologies of digitalisation to enable access and use of the old maps, plans, atlases and globes.**
- **2011 – 2015**
- **Web of project: *naki.vugtk.cz***
- **Objectives:**
 - to create an expert system of knowledge in the form of a web portal whose main component will be a set of on-line tools for digitalisation, processing, publicising and utilising of old maps, plans, atlases and globes.
 - an open on-line database of old cartographic works = Virtual Map Collection - Chartae-Antiquae.cz
 - system will also involve publicising of methodology and technological procedures which will be created in the course of the project.

Digitizing center of old cartographic products

Maps and atlases – precise cartometric scanner ScannTech 800i

- format A0+,
- optical resolution **800 dpi**,
- color depth 24-bit, ICC profile,
- Maximal deviation in positioning **0.2 mm**,
- maintaining cartographic map properties,

Digitization of old cartographic products

- mostly at 600dpi resolution, the more valuable maps and atlases at 800dpi
- 2 copies are archived in TIFF with LZW compression,
- metadata on digitized maps are stored in a database and used to search maps, import or enter via web form (name of the map, scale, year of publication, the definition of the displayed area (Bounding Box), author, Publisher, edition ...)
- technical metadata are added after digitizing (file name, date of digitizing, scanner type, resolution, color profile (ICC), checksum (hash) label media for archiving, ...)
- **Scanned over 70 000 old maps, and 107 atlases, for example:**
 - G. a J. Blaeu, Theatrum Orbis Terrarum Sive Novus Atlas, 1644 – 1646, 4 parts,
 - J. Blaeu, Atlas Maior Sive Cosmographia Blaviana, 1662, 11 parts
 - M. Martini, Novus Atlas Sinensis, 1655
 - J. D. Cassini, Map of the France, 1756 – 1815
 - B. D´Alb, Map of the Apennine peninsula, 1792 – 1798
 - P. Fabricius, Map of the Moravia, 1573
 - J. A. Komeský, Map of the Moravia, 1640

Virtual Map Collection - chartae-antiquae.cz

- It is now available to **50 025 map sheets** from various map collections in the Czech Republic,
- in some months approximately **70 000 map** = rich resource of old cartographic works,
- published in the maximum available resolution (**mostly 600dpi, often 800dpi**)
- **Zoomify**, watermarked
- **georeferenced** map are accessible by Web Map Service (**WMS, TMS**)
- **Web applications** to work with old maps: geographic search, Zoomify map viewer, MapComparer, 3D models of globes viewer, automated search of map symbols on maps III. Military Survey, viewer of the atlases, Zoomify to WMS, display WMS in 3D view
- **Users** = historians, cartographers, surveyors, landscapers, environmentalists, water managers, urban planners, architects, students, researchers, the general public, lovers of old maps, ...

Mapa města Hlinsko

Scale: 3626

Non-numeric scale: 10 böhmischen Landseilen

Edition: neuvedeno

Publication year: 1731

Author: Ing. František Xaver Preitsch

Owner: Státní oblastní archiv v Zámrsku

Annotation: Rukopisná kolorovaná mapa podlepená plátnem o rozměrech 124,5 x 143 cm. Mapa zobrazuje město Hlinsko. Jednotlivé pozemky jsou značeny literami nebo značkami, které odkazují na osedlé majitele pozemků (Phillip Wyd, Mathes Swanda, Crispin Tichey, Jacob Ludwik, Anna Nechutin, Fridrich Woda, Thomas Claudi, Lorentz Woldan, Thomas Tlaskal, Thomas Frdrich (sic!), Wentzl Wokal, Thomas Tlustey, Georg Mauska, Jacob und Georg Swoboda, Carl Woda, Wentzl Klubal, Georg Bohuslav, Thomas Pracharsch, Thomas Prochazka, Thomas Swirschina, Mathes Kosynsky, Johann und Mathes Woldan, Wentzl Wobrovsky, Anna Malínskin, Wentzl Woda, Johann Schwanda, Martin Sochol, Carl Woda starší, Thomas Bohuslav, Jacob Tuma, Johann Schafranek, Thomas Schafranek mladší, Johann Severin, Johann Wobrausky, Stanislaus Wokal, Wentzl Fiala, Thomas Gragor, Jacob Ludwik, Thomas Tlustey, Mathes Kosynsky, Wentzl Pantuschek, Carl Zach, Catharina Wokalin, Dorotea Tržewikošin, JOhann Tlaskal, Johann Tainka, Wentzl Byska, Wenzl Stepanoskey, Jacob Pantuschek, Mathes Prokop, Johann Ryschawy und Max Wobrausky, Mark Urbanides, Wentzl Dainku, Martin Kuamek, JOhann Akermann, Wentzl Tlaskal, Georg Ackermann, Johann Woldan, Caspar Fickel, Thomas Schaffranek, Mathes Borowitschka, Johann Bysko, farní pozemky, kostelní pozemky, obecní a pozemky kaple sv. Jana). Mapa rozlišuje druhy pozemků. V levé horní části růžice světových stran, v pravé horní tabulka s osedlými a názvem mapy. V pravém dolním rohu mapa pozemku ve Studnici, orámován s ozdobnou volutou. Mapa nese grafické měřítko. Autorem mapy je Ing. František Xaver Preitsch, v letech 1737-1765 zemský měřič. Digitalizaci provedl VUGTK v rámci projektu "Kartografické zdroje jako kulturní dědictví. Výzkum nových metodik a technologií digitalizace, zpřístupnění a využití starých map, plánů, atlasů a glóbbů." Identifikační kód projektu: DF11P01OVV021

Map symbols of 3rd. Military Survey

3rd Military Survey 1 : 75 000 are one of the most important and attractive maps covering the territory of the Czech Republic. The importance of these maps lies in their rich set of map symbols, detailed coverage of the Czech Republic (and Slovakia) and long period of use.

This application shows the positions of map symbols of 3rd Military Survey. These positions were found out by certified technology for map symbol detection on scanned images of maps from the collection of [The Institute of History, Academy of Sciences of the Czech Republic](#). The maps were scanned with 400DPI resolution.

The image below shows the map layout of 3rd Military Survey, each sheet pointing to a detailed view showing the map symbol positions.

Web applications on chartae-antiquae.cz

Zoomify to WMS - web application for Georeferencing of your own maps accessible in Zoomify

Web applications on chartae-antiquae.cz

display WMS or TMS in 3D view - web application for displaying of your own georeferenced old maps accessible in WMS or TMS on 3D terrain model

The screenshot displays the web application interface for chartae-antiquae.cz. At the top, a green navigation bar contains links for Search, Map series, Applications, Globes, Atlases, About, Help, and Contacts. On the right side of the navigation bar, the text "Virtual Map Collection" and "čeština" are visible. Below the navigation bar, a dark control panel on the left side allows users to manage map layers. It includes a checked "TMSLayer" option, a dropdown menu for "2. vojenské mapování", another dropdown for "3. vojenské mapování", and a checked "Bing Maps Aerial" option. The main area of the application shows a 3D terrain model of a region, with historical maps overlaid. The terrain is rendered in shades of brown and tan, showing topographical features like hills and valleys. The overlaid maps are in various colors, including sepia, blue, and red, and contain text in both Czech and German. Key locations visible on the map include "Letteh", "Vesky Vzeb", "Lulow (PE.)", "Husinec", "Moldau", "Waltuschitz", "Hoslice", "KAPLIČKY", "NA ZABITYM", "NA KAZATEDLNE", "V LOPCI", "ČTYRY HONA", "Gr. Klec", "Stalín", "M.H.", and "Pustol.". At the bottom of the application, there is a playback control interface with a play button, a "3.6x" zoom level, and a timestamp of "Apr 21 2016 12:26:03 UTC". Below the playback controls, a row of time markers is displayed: "Apr 21 2016 00:00:00 UTC", "Apr 21 2016 04:00:00 UTC", "Apr 21 2016 08:00:00 UTC", "Apr 21 2016 12:00:00 UTC", "Apr 21 2016 16:00:00 UTC", and "Apr 21 2016 20:00:00 UTC". The bottom of the page also contains a footer with copyright information: "CESIUM | bing | MapQuest | Open Street Map and contributors | CC-BY-SA | © Analytical Graphics Inc. | © CGIAR-CSI | Produced using Gopernicus data and information funded by the European Union - EU-DEM layers | © 2016 Microsoft Corporation | © Harris Corp. | Earthstar Geographics LLC | Earthstar Geographics SIO | © 2010 DigitalGlobe | © 2010 GeoEye | © GeoContent | (p) Intergraph".
